PRESIDENT'S  
MESSAGE

COUNCIL  
ELECTIONS

SCIENCE WEEK  
DETAILS

# EDITOR'S DESK

Welcome to the Autumn edition of the College Courier. The College is preparing for the largest single cohort of examination candidates and planning is well underway for a face to face Science Week – highly anticipated after two years of postponements. Last year brought bushfires, this year brings floods – our thoughts are with all those who have been impacted.

# PRESIDENT'S MESSAGE

Dr Amy Lane, President

From all accounts, 2022 was greatly anticipated. There was a collective desire to acknowledge the challenges of 2020 and 2021, but relinquish them to the vaults of history, never to be seen again.

Unfortunately, the fairy-tale dream of life returning to 'normal' was not to be, due to the ongoing cycles of COVID, and now widespread floods in parts of Australia, and war in Europe. However, as with most tragic events, witnessing how communities rally to provide support to each other, is inspiring and allows us to believe that, once again, we will come through it all.

Community and People is one of the College's six Strategic Priority/Focus areas: 'We know that success is achieved through our people, including our volunteers and members'. Community is also one of the College's six values: 'We pride ourselves on shared purpose, goals and mutual support'.

Why is community considered so important to be recognised in both the Strategy and the Values of the College? Because we need a strong community to be able to achieve, and continue to deliver, the Purpose of the College: 'Advancing professional qualifications and education across the veterinary sector, for the benefit of society'.

Council has recently reflected on how we can continue to develop the community connection between our members. First and foremost, we are aiming to ensure that opportunities for in-person gatherings will occur.

College Science Week 2022 will be an in-person event at The Star, Broadbeach, QLD from June 23-25 (with an online registration also available). The 3-day conference provides educational presentations which span the breadth of 24 College Chapters.

It is the Australasian conference renowned for providing 'cutting edge' research findings from specialists in their field and emerging young scientists. It is also an anchor that brings veterinarians from many geographically distant regions together to share their common interests and perhaps gain support for some shared challenges being faced.

The travel restrictions over the past two years due to the global pandemic has also taught us that regional community is highly important. One of the strategic goals is for the College to facilitate in person gatherings, whether that be as an educational forum, prospective candidate subject study groups or a social forum, to strengthen regional collegiality.

The New Zealand Network has demonstrated how desired this regional connection is with meetings attracting over 100 attendees at meetings that were made available online as well as in-person, including non-members who have an interest in the subject matter being delivered. If you are interested in seeing a regional College meeting occur in your location, please contact the College office with your enquiry.

Recognising that members may still not be able to meet in person due to

location or time constraints, virtual gathering spaces are also being developed through the ANZCVS Chapter portal sites using the Microsoft 365 platform. These are areas where Chapters can 'meet' for informal case discussions, regular journal clubs or a more structured speaker event.

The virtual world has allowed the 2022 examiners to have a dedicated space to collaborate on the development of examinations and a secure space to store confidential documents. This has increased efficiency and will also allow examination review by the Board of Examiners to proceed more easily.

The provision of our core business of certification will also proceed with increased efficiencies this year with written papers being in an online format. With approximately 400 examination candidates to service this year, a more digitally based system will hopefully ease the manual strain that is placed on the office staff during the examination period.

I wish to commend the CEO Stephen Alderman and the office staff, with the aid of the Chief Examiner Peter Bennett and the Board of Examiners in bringing this pivotal piece of digital transformation to fruition.

As always, I wish to thank the other Council members for their time and input into our discussions during our regular (virtual) meetings. I, too, am very much looking forward to being able to meet again in person during College Science Week in June.

# CEO REPORT

Stephen Alderman, CEO

Weather events may still challenge the communities where you live and work.

It is a difficult time for many members, and as a small assistance we have offered the following:

***“Any College member negatively impacted may request to have their subscription fee due dates deferred for six months as individuals and businesses take time to recover.”***

The College office in Queensland was not affected by weather, although there were a few days where some staff were unable to find a route to work due to flooding.

The College has processed over 400 examination applications this

year, a record for any single year in ANZCVS history.

This year written examinations will be delivered online at invigilated venues. The online examination system “Examina” is in place and we are working on the support materials. As part of our implementation plan, access to the online system will be provided to all candidates well in advance of examinations. Candidates will be able to familiarise themselves with the complete experience, including mock examinations.

Planned additional support:

- Scheduled online demos with Q&A
- Recorded walkthroughs

- Published Frequently Asked Questions
- Staff ready to assist candidates with the process

Every 2022 candidate will receive details on the written examination process and requirements in the coming weeks.

Science Week 2022 is shaping up well, with 24 Chapters providing programs throughout the event. This year we have engaged a professional conference organiser, “Arinex”, to help ensure we deliver the best experience possible to all delegates. We also have a 50<sup>th</sup> Anniversary to celebrate during Science Week. You can book your tickets now.

“Getting more from my finance partner, means my patients get more from me.”

Professional and personal finance solutions, tailored for you and turned around fast. When you partner with Credabl, you can expect all that and more. With a team of experienced finance specialists, we understand the veterinary sector so you can look forward to finance solutions that help you get on with business and looking after your patients.

**You always get more with Credabl.**

# ➔ EXAMINATIONS REPORT

Dr Peter Bennett, Chief Examiner

We have entered a new year and I would once more sincerely thank all the members of the College who have, and are, contributing to the successful preparation and running of the examinations.

Without the hundreds of volunteers who participate as examiners, observers, Chapter executives, Board of Examiner members and the Council, ably supported by the office staff, the examination process would not be able to proceed. The 2022 examinations are proceeding with another large cohort of candidates sitting Membership.

As a follow up to the virtual meeting held in November for the examiners, the members of the Board spent the first weekend in February, meeting with many of the examination teams to support their preparation for the examinations.

The preparations are proceeding, and we look forward to providing another quality examination period. We are all appreciative of the work, at times during periods of personal disruption, that the examining teams have volunteered to the College.

The office staff are continuing the preparations for the examination venues and systems for the 2022 papers. While restrictions due to the pandemic are lessening, they are not gone, and this has made sourcing venues more difficult. We have planned to limit requirements to travel, as while this is easier, it is not normal.

Ms Jenny Burnett has taken on the challenge of examinations officer and the Board is appreciative of her work and support in the preparation of the examinations. I would like to thank the assistant examination officers Lynda

and Jill, along with remainder of the College office staff for their support of the work of the Board. The assistant chief examiners, Jen Carter, and Linda Abraham, continue to provide me with great support, along with the Board members, Stephen, Lydia, Yenny, Liz, Jana and Rena.

As the candidates prepare for their upcoming examinations, I wish them all the best. Hopefully the ongoing pandemic and weather systems will not throw any more additional challenges as we get closer to the examination periods.

## MANDATORY INTENTION TO SIT DATE FOR FELLOWSHIP CANDIDATES

Closing date to register intention to sit for Fellowship examinations in 2023 is **30 June 2022**. No applications will be accepted after this date.

Fellowship Candidates wishing to sit Fellowship examinations in 2023 should note that it is mandatory to register their intention to sit with the College office before **30 June 2022**.

**NO** applications to sit the Fellowship examinations will be accepted after this date. Candidates who register an intention to sit, but do not comply with current credential guidelines will be able to withdraw their application before the 31 October.

Please note that the Credentials date of 31 October remains the same, and at this time all requirements outlined in the training guidelines must be completed.

# UPDATE PROJECT OFFICER

Dr Rachel Tan, Project Officer

## SCIENCE WEEK 23-25 JUNE 2022

Science Week 2022 will see a record number of 24 Chapters presenting a program. The return to an in-person conference has been highly anticipated. In addition to in-person registration, virtual registration will also be available, with all delegates having access to all available content for three months after Science Week on-demand through the Science Week 2022 Event Portal.

The Jubilee Conference Dinner on the Friday night has also been redesigned to move away from the formal awards ceremony of prior years to celebrate the 50<sup>th</sup> Anniversary of the College. There will be a festive atmosphere with food stations and live music and we look forward to seeing you all there!

### Science Week 2022 Participating Chapters

Animal Welfare	Pig Health and Production
Cattle	Radiology
Dentistry	Small Animal Medicine
Dermatology	Small Ruminant
Emergency and Critical Care	Surgery
Epidemiology	Veterinary Anaesthesia and Analgesia
Equine	Veterinary Behaviour
Feline	Veterinary Oncology
Medicine and Management of Laboratory Animals	Veterinary Practice Small Animal
Ophthalmology	Veterinary Public Health
Pathobiology	Veterinary Sports Medicine and Rehabilitation
Pharmacology	Zoo and Wildlife

The preliminary program and registration site can be found at the Science Week website: [www.vetscienceweek.com.au](http://www.vetscienceweek.com.au)

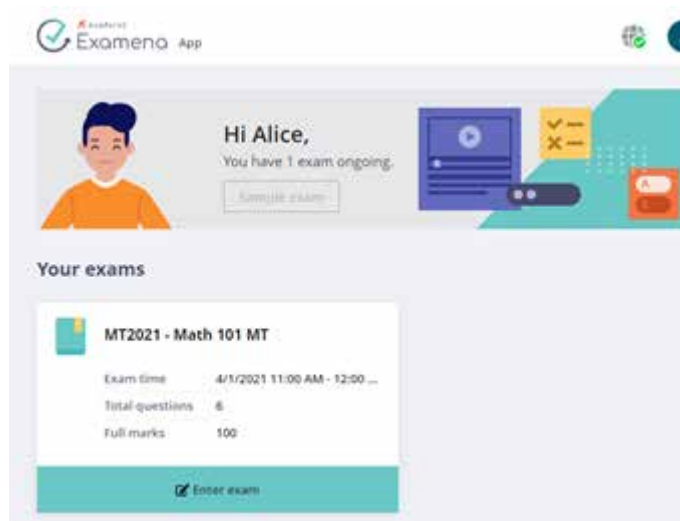

## ONLINE EXAMINATION DELIVERY 2022

Preparation for digital delivery of Paper 1 and Paper 2 for all examinations is progressing well using the Examena Application.

User information for both Candidates and Examiners have already been prepared and are scheduled for release in the upcoming months. Each candidate will have a user-friendly dashboard where their scheduled exams are displayed.

A demonstration examination will be released at the end of April so that candidates can test the system and its' various functions. This sample exam may be accessed multiple times prior to the exam period.

If you have any questions about the Science Week or Online Examination Delivery, please contact me at [po@anzcvs.org.au](mailto:po@anzcvs.org.au)

# ➔ COUNCIL ELECTIONS

The College Council is the body that administers the College on behalf of the Membership. Your involvement is essential.

Two places on Council are available for election this year, with nominations for these positions currently being called. Dr Zoe Lenard will retire from Council in July after serving six years as a Councillor. We have been greatly appreciative of Zoe's support, leadership, integrity, dedication and hard work, especially in her role as President, where she oversaw a transition to a more strategic Council.

We thank Zoe for her valuable contribution to the College, and wish her all the best. Dr David Tabrett has indicated that he will stand for re-election to Council. Dr Tabrett is the current Honorary Treasurer and Chair of the Finance and Risk Committee and the Governance Working Group.

All members should consider nominating for Council if you have an interest in the future and objectives of the College and a desire to make a significant contribution to the veterinary profession.

Councillors are offered directorship training and extensive support from the College office and find the experience of serving on Council to be a most rewarding and enjoyable one. All financial Members and Fellows of the College are eligible for nomination and election for Council. **A nomination form is available [here](#).**

As a member of the Australian and New Zealand College of Veterinary Scientists, you are encouraged to vote in the 2022 Council election. Council, as the Board of Directors of the College, manages the strategic objectives of the College and therefore significantly influences the future of the veterinary profession in Australia and New Zealand.

## RESPONSIBILITIES OF COUNCILLORS

1. Councillors should hold copies of and be familiar with the current Constitution.
2. Councillors have an obligation to participate actively in College affairs and activities and to this end should familiarise themselves with the decisions of the Council and Board of Examiners by reading all Minutes, Policies, Memoranda and Reports distributed by the College Office. Councillors should respond to College issues raised in these documents.
3. Councillors should maintain an active interest in the affairs and activities of the College and its Chapters and provide an avenue of liaison and guidance.
4. Councillors have an obligation to attend in-person Council meetings and the Annual General Meeting where fares, accommodation and necessary meals are paid by the College.
5. Councillors should act as ambassadors for the College by promoting membership and fellowship.
6. Councillors have the same legal responsibilities as the directors of any company of limited liability.
7. All elected Councillors must be prepared to offer themselves for office.
8. Councillors will receive extensive support from College management staff, plus training in corporate governance.

## HOW TO NOMINATE

To nominate for Council, please download and complete the online form available [here](#). Nominations close 15 May 2022.

# ➔ BOARD OF EXAMINER NOMINATIONS

Australian and New Zealand College of Veterinary Scientists

## Board of Examiners (BoE) Call for Nominations

The Board of Examiners is seeking two new Members or Fellows of the College to join the Board of Examiners. **In order to join the Board, you must have previously served as an examiner for the College**, and have an interest in examinations, assessment, education and the College generally. Expertise in assessment practice and/or managing training programs is highly desirable.

Interested persons must be available for Board of Examiners meetings, the Examiners Workshop February annually and examination duties during the Science Week examination period, and must be enthusiastic and willing to contribute to Board activities. Successful applicants will be selected by Council following recommendation made by the BoE. It is desirable that within the Board there be representation from a wide breadth of subject backgrounds and working experiences, a mixture of Members and Fellows, a gender balance, and some representation from New Zealand.

Board of Examiners members join either the Training and Credentials Committee or the Examinations Committee. They are expected to attend College examinations to act as observers during the examinations, and attend the Board meetings. These are currently held via Zoom, however there are usually two - three face-to-face meetings held when possible in addition to videoconference meetings as required during the year. BoE members should be able to devote at least five-seven hours per week to duties associated with the Board of Examiners. They are valuable members of a progressive and dynamic team, ably supported by College staff.

For further information please contact the College Office.

An application form is attached. Completed application forms should be forwarded to the College office by email or post by **Friday 6 May 2022**.

# ANZCVS SCIENCE WEEK 23 - 25 JUNE 2022

 The Star, Gold Coast

Delegates attending the three-day cutting edge scientific program have the options for in-person or virtual registration with full access to 3-months of on-demand content (excluding abstract sessions).

ANZCVS will hold Science Week on 23-25 June 2022 at The Star, Gold Coast with health and safety precautions in place.

## KEY DATES

- Registrations open: 1 March
- Final program release: 28 March
- Abstract submissions close: 29 April
- Conference dates: 23 - 25 June

## PRELIMINARY PROGRAM

The preliminary program features 24 Chapters participating both in-person and online.

[View the preliminary program here.](#)

## REGISTRATION

Registrations open 1 March! [Complete the registration form](#) to gain access to the Conference and on-demand recordings 3-months post-event.

# ➞ MEMBER SPOTLIGHT

## DR PANAYIOTIS MAVRIKIOS DVM MRCVS MANZCVS

Dr Mavrikios became a member of the College In Medicine of Cats (UK) in 2013. He shares some of his thoughts on the membership process, as a European based veterinarian.

"I consider this to be a very fair examination process that covers all aspects of Feline Medicine as well as basic knowledge of basic sciences.

For me, it was more about the journey than the actual exam itself. The preparation process was very interesting: studying for an exam for the first time since graduation was a big challenge, especially as I was taught veterinary medicine in Greek and this exam is in English.

Based in London, I had the opportunity, as part of my revision, to meet up with other candidates as well as mentors on a monthly basis (feline club meetings) where we would discuss examination-related matters and support each other.

I felt I learned quite a lot during my study and if I could only pick one thing from this process, is that it really helped me organising things quite well in my head so I could then go and demonstrate the level of knowledge and depth of understanding required for Membership level. Exam technique was as important as knowledge for being successful during my attempt.

For us European vets, this is a fantastic opportunity to obtain a further qualification in Feline Medicine and it was great to hear that ISFM

“

For us European vets, this is a fantastic opportunity to obtain a further qualification in Feline Medicine and it was great to hear that ISFM has adopted the Membership in Medicine of Cats as its official postgraduate qualification.

”

has adopted the Membership in Medicine of Cats as its official postgraduate qualification.

Furthermore, vets in the UK can now apply for Advanced Practitioner status on the basis of this qualification.

Achieving Membership in Medicine of Cats has helped me in many ways in my career and certainly opened a few doors for me. Overall, it boosted my confidence and colleagues would

very much value my input on their feline cases.

I can help my community by providing advice and support to fellow veterinarians and cat lovers, and I can spread important information related to health and well-being of cats. I feel privileged to have worked in a state-of-the-art cat-only practice, something which I don't think it would have been possible without this qualification."

*Best, Panayiotis*

# ➔ CHAPTERS

---

## ANIMAL REPRODUCTION CHAPTER

Dear Members

Many of our members have had a busy stud season, with the rest keeping themselves busy assisting in bringing new life to the planet.

There are some interesting developments in the reproduction welfare scene with updates in the welfare legislation in Victoria and NSW and possibly other States.

It has been a good time to consider many aspects of fertility assessment and breeding of animals. It looks like it will be a good time to bring various Chapters together to debate and discuss in particular, the ethics and welfare of surgical artificial insemination in canines, and the use of electro-ejaculation in ruminants.

Our chapter is intending to have our next Science Week gathering in 2023

when we hold our next examination round. We look forward to welcoming new members then, and to meet up and discuss topics pertinent to our speciality with the rest of the College members.

*Allan Gunn, Jasmin Hyatt,  
Natali Krekeler  
(Reproduction Chapter committee)*

---

## ANIMAL WELFARE CHAPTER

### 2022 Science Week

The Animal Welfare Chapter program is finalized, with the first day focusing solely on animal welfare with a fantastic array of topics and speakers ranging from confiscation of animals from illegal trading, euthanasia of zoo animals, fish welfare and a focus on cattle including a presentation from our inaugural student award winner, Yolande Kaurivi on cow and calf welfare in Namibia.

Our joint sessions with Animal Behaviour and Small Ruminants are also shaping up to be really interesting and informative with the behaviour sessions focusing on the interface between behaviour and welfare in clinical settings. Several species will be covered in the small ruminant sessions including alpacas, sheep and goats. We are excitedly anticipating having as many people as possible attend in person.

### 2022 Examinations

Examination preparations are well in hand with the final run down to papers being finalized.

### 2022 David Bayvel Award

We are now calling for applications for the prestigious David Bayvel Award, which close on 31st March. Please email submissions or queries to Kat Littlewood

[secretaryanimalwelfare@anzcvs.org.au](mailto:secretaryanimalwelfare@anzcvs.org.au)

---

## DENTISTRY CHAPTER

The Dentistry Chapter have an exciting program organised for Science Week with presentations from chapter members, an equine specialist and two specialist human dentists (a prosthodontist and a periodontist).

We are looking forward to all being able to meet up in reality! This year we have candidates in both Equine and Small Animal disciplines sitting membership exams, so hopefully we will soon have even more members to join our small and enthusiastic group.

Members in Victoria are planning a social event this year and the challenge is out for all members in other Australian States and NZ to do the same!

We would appreciate photos so we can post them to the Facebook page.

Finally, in 2023 the Chapter turns 30! A great chance to celebrate the College and Dentistry Chapter, so we will be brainstorming ways on how to best to achieve this.

Our thoughts are with all the vets involved in the challenges of today in our part of the world, namely the recent flooding in Queensland and NSW and the spread of Covid.

*Kia Kaha, Stay Strong*  
*Janine van Dam BVSc MAVZCVS*  
*Dentistry Chapter President*

---

## VETERINARY ANAESTHESIA AND ANALGESIA CHAPTER

Pigs? Sheep? Horses? ... and anaesthesia? Yep, we do it all!

This year's VAA programme is large animal focused with combined sessions with both Pig Health and Production and Equine, plus fascinating presentations on new information on sheep sedation and possible side-effects, along with an up-to-date review on equine recovery from general anaesthesia, monitoring sedation for equine standing surgery plus plenty more.

Hear about non-technical skills of the anaesthetist and abstract presentations from our current residents, interns and researchers. With plenty of discussion time and opportunity for Q&A, this year's Science Week Veterinary Anaesthesia and Analgesia programme promises to be large!

We will also launch our strategy for Chapter led continuing education for vets and nurses. This initiative was borne from the outcomes of our Working Group, who investigated

the nuances of monitoring animals during anaesthesia and the variation in prioritisation for monitoring amongst vet students, veterinary educators, vet nurses and experienced vets.

The continuing education programme will be revealed during Science Week and promises to be an essential resource for vets and nurses aiming to provide the best peri-operative care for the animals in their care.

*Gabby*

---

## VETERINARY ONCOLOGY CHAPTER

The Oncology Chapter have been busy preparing for the 2022 fellowship examinations.

We had our annual meeting to plan the 2022 examination at the end of last year with the specialists and for a resident review session for the residents, all done online via Zoom.

This "new normal" method of meeting during the pandemic has meant more people have been able to access these meetings which has been an unexpected benefit.

Thank you to Dr Ken Wyatt for chairing the meeting and taking on the head examiner role and to Dr Liz Morgan who has taken on the second examiner role. Thank you also to the specialists who presented at the resident review workshop: Dr Valerie Poirier on radiation therapy, Dr Claire Cannon on examination technique and Dr Peter Bennett on immunology and immunotherapy.

Drs Kathleen O'Connell and Penny Brown have again been keeping

busy planning for the 2022 Science Week program and we look forward to sharing more details with you all soon regarding the content and speakers. This is planned for an in-person conference at the Star in Broadbeach. If you have any interest in presenting, please feel free to contact Kathleen, Penny or myself.

We thank Penny and Kathleen once again for their tireless efforts in organising the Science Week program.

Otherwise, it has been a quiet quarter for the Oncology Chapter as we consolidate and prepare for the examinations and Science Week program. Please don't hesitate to contact us regarding any chapter matters and if you would like to be involved in chapter activities.

Warm regards,  
Laura Brockley  
([presidentvetonco@anzcvcs.org.au](mailto:presidentvetonco@anzcvcs.org.au))

---

## VETERINARY PRACTICE SMALL ANIMAL CHAPTER

The recently formed chapter, Veterinary Practice Small Animal, is excited to be planning an inaugural Science Week program.

The team has compiled a fascinating two days devoted to the many problems associated with brachycephalic breeds.

This will include presentations from specialists in many disciplines, including ophthalmology, cardiology, oncology, dentistry, anaesthesia, critical care, dermatology, airway surgery, spinal deformities and presentations on anaesthetic recovery and nutrition.

The Chapter will also have a forum on the efforts being made to alter and improve the phenotype of these breeds.

The Chapter is pleased to announce that Royal Canin has come on board as the major Chapter sponsor, and thanks them for their support.

In other news, the examinations team is hard at work, finalising membership examinations in Veterinary Practice Small Animal – our third examination offering. We wish all our candidates the very best of luck.

### VETERINARY SPORTS MEDICINE AND REHABILITATION CHAPTER

The Veterinary Sports Medicine & Rehabilitation (VSMR) Chapter has been busy in the past few months.

The VSMR Subject Exams Committee is preparing the inaugural VSMR-Canine papers to be sat for the first time this year, and the VSMR-Equine are not far behind; with confirmation that the inaugural VSMR-Equine exams will be run in 2023.

There has been strong interest in membership candidates wanting to sit both papers, with over 10 people planning to sit the canine exam in its first year. I am extremely grateful for all the hard work and time both the Subject Standards and Subject Exams Committees teams have put in to ensuring that the exams proceed.

The Science Week Convenors have also been really busy organising sponsors and speakers for this year's two day VSMR stream.

Friday's stream is Equine focussed, with topics focussing on back pain, and poor performance in race horses. Saturday's stream is Canine focussed with a range of topics covering rehabilitation in intensive care situations, iliopsoas injuries, vestibular disease, canine back pain and management of phantom limbs. Excitingly we have collaborated with

the Surgery and Radiology chapters to provide talks on intervertebral disc disease, imaging and treatment updates as well.

We look forward to seeing you all there, and being able to discuss the benefits of collaboration amongst our fields to improve patient outcomes!

### ZOO AND WILDLIFE CHAPTER

With the dawning of a new year comes a new name for the former Zoo and Wildlife Medicine Chapter.

Following a successful motion put forward by the Chapter Executive and Standards Committee at the September 2021 AGM, we have been reborn as the Zoo and Wildlife Chapter.

The removal of the word 'Medicine' reflects the expansion of the role of veterinarians working in the zoo and wildlife sectors into fields beyond medicine. In addition to the clinical management of health problems of individuals, members of our chapter are involved in population management, animal welfare, behaviour, reproduction, veterinary aspects of conservation projects, biosecurity, emergency response and zoonotic disease surveillance. So, it's not just biodiversity we're passionate about, but our own diversity too!

The Chapter was delighted to welcome two new members in 2021, Dr Petra Schnitzer and Dr Kathlyn Reed. We

look forward to the future contributions they will make to this dynamic field and our chapter activities.

Meanwhile the Examinations Committee, and particularly the examiners, have been working tirelessly to compile the 2022 papers for upcoming examinations in both of our chapter subjects. Concurrently, plans are underway to update and refresh the chapter website, so please do get in touch to suggest content you might find useful.

After a successful and enlightening one day online Science Week program in 2021, covering topics from emerging infectious diseases to wildlife triage, and diagnostics to therapeutics, the program for our 2022 event is currently being finalised. Once again David Blyde is doing a sterling job in his role as Science Week Chapter Convenor and we encourage all interested presenters to contact myself or David as soon as possible to discuss any last minute proposals.

To balance last year's free-ranging wildlife focus, we intend to shine the spotlight this year on cases and issues relevant to captive care and want to mine your minds for input on wildlife emergency management guidance. We are optimistically looking forward to meeting up in person and can't wait to see you on the Gold Coast in June!

Finally, with natural disasters and disease outbreaks afoot again across our region, please stay safe out there.
