PRESIDENT'S MESSAGE

This is a very busy time of the year for the College. As the organisation prepares for a record number of Membership and Fellowship candidates in 2018, Council members are reminded of the importance of managing growth and expansion of the College while continuing to strive to engage and support the current membership. In this light, the College Council is pleased to report the appointment of a new Marketing, Events and Member Engagement officer, Mrs Thy Boskovic who began her employment with the College office in early April. The creation of this role represents a key aspect of the College strategic plan, encompassing brand and profile building; engaging members by identifying member benefits and the promotion of a positive image of the College to current and future members and the general public. Mrs Boskovic has worked previously in a similar role with the Australian Medical Association and is familiar with the challenges confronting our organisation. Her first assignment was to assist with the organisation of the Council meeting in September 2018 in Auckland. Under the leadership of the new President, Dr Zoe Lenard, Council will be holding a series of meetings with key stakeholders, including the New Zealand Veterinary Association, Veterinary Council of New Zealand and representatives from Massey University as well as important members of the College community, Professor Boyd Jones, Gavin Shepherd and Stuart Burrough. Councillor Wayne Ricketts has been pivotal in the

organisation of this meeting and Council is very pleased to acknowledge the important role that New Zealand plays in the fabric of the College. A social function has also been organised for all College members after the Council meeting and all members are very welcome to attend as guests of College Council.

An integral component of the College year is Science Week and from July 5 to July 7, 2018, a number of Chapters will be offering different streams of advanced and comprehensive continuing specialist education covering a range of topics for the veterinary delegate. Please visit the College website and check out the Science Week program www.anzcvcs.org.au. Science Week provides a perfect opportunity to catch up with colleagues and friends in your specialty as well as supporting your Chapter. This year we have an exciting plenary session from Dr Fiona Moir, a psychiatrist with a reputation for delivering both entertaining and thought-provoking material about wellness; we would strongly encourage all members to attend.

Continued over...

PRESIDENT'S MESSAGE CONTINUED...

This year is the last time that Science Week will be held at the QT Hotel on the Gold Coast. Council has invested significant time and effort in evaluating options for venues that will permit meeting expansion but also limit the economic risk of moving to a larger venue. In 2019, College Science Week will be held at the Star Convention Centre on the Gold Coast. This convention centre offers us conference style facilities with more expansive lecture theatre areas and a larger commercial exhibition centre. Council envisages that this new location will permit a significant expansion of Science Week and a more professional conference experience.

Meanwhile College Council have been busy on behalf of members. Council has funded the annual Examiner Workshop and additional Small Animal Medicine and Small Animal Surgery Examination writing retreats were funded as individual events. Examiners reported that these were highly productive and the Board of Examiners report that workshops have made a measurable difference to timeliness of examination submission, the quality of the examination and the quality of the examiner's experience.

Council is delighted to announce the introduction of two new Membership subjects. The Board of Examiners and Council have approved the Guidelines for Membership in Veterinary Practice – Equine and Small Animal and these are now available on the College website with applications open for inaugural examinations in 2019. In addition to the Guidelines, sample written examination papers will be made available to provide prospective candidates with a representation of the depth and breadth of the examinations.

I would like to finish by thanking every individual contributing to the College community; at this time of the year we must acknowledge our hard working College office staff including our Executive Officer, Kim Hudson, the College Manager, Dr Mary Anne Hiscutt and the Assistant College Manager, Ms Sharon Tinsley, who are gearing up for Science Week. We are indebted to the diligence of the examinations team in the College office, including the Examinations Officer, Ms Robyn Pettigrew and her assistant, Ms Lynda Kennedy and the Chief Examiner, Dr Tias Muurlink with the Board of Examiners who have worked tirelessly to ensure the highest quality of examinations are delivered on behalf of the College.

Examinations are our core business and we have an obligation to all candidates to ensure that all examinations are robust and the examination process is transparent and fair. We are equally indebted to the many College members who volunteer as examiners and reviewers. The College Council would like to extend their gratitude to those individuals that make such a significant voluntary contribution to ensure the success of the examination process. The College relies on the volunteer efforts of their members and whether you participate as a Chapter Executive, website administrator, Science Week convenor or on a Chapter Examination Committee; in an examination or review team; or as an examiner or speaker, we thank you for your contribution. To all the examination candidates for this year, I wish you the best of luck.

EXECUTIVE OFFICER'S REPORT

EXAMINATION RESULTS RECORDING SYSTEM

Following last year's successful debut, the College will again be using the Electronic Results Recording System for examination marking. The ERRS has been developed to streamline the entire examination marking system, introduce a higher level of consistency in marking, save considerable time post-examination when providing feedback to Candidates, and provide the Board and Council with instant reporting on comparative results.

All examiners have been sent written instructions which explain how to use the ERRS, and the secure Document Library site on the website also hosts a series of training videos (see ERRS Training Videos). If you have any issues using the ERRS please contact either our examinations staff or myself.

Council elections & AGM

Electronic elections for two vacant Council positions are currently underway. The elections are being run by Truevote, which was also used last year to carry out the vote to amend the College Constitution. Truevote's system is encrypted and very easy to use.

You should have received an email from Truevote on 25 May explaining how to use their system. If you experience difficulties when voting, the email includes contacts for Truevote's support services. Voting closes 11:59 p.m. Australian Eastern Standard Time, Friday 29 June 2018.

This year's AGM will be held in North Break, Second Floor, QT Gold Coast Hotel, Surfers Paradise, Gold Coast, Queensland on Friday 6 July 2018 at 5.30 p.m. If you are attending Science Week this year, or are otherwise at the Gold Coast, please try to come along to this important meeting.

Science Week is coming...

Links to the 2018 Science Week program and registration/payment are now available on the College website. If you're planning to go and you haven't booked your registration, travel and accommodation, it's time to do so!

The College website features a Science Week tab where you can find information about the huge range of speakers and special events being run by Chapters this year. For the first time a selection of sessions will be digitally recorded and made available online a fortnight following Science Week. These lectures will be embedded into the website and available until the end of the year. We hope this will be a valuable resource to Members and showcase some of the content available at Science Week to veterinarians who could not attend.

Examinations are now underway! As the College largely relies on volunteers to create and run examinations, I'd like to thank all those people who are currently making extra space in their work and private lives to help deliver this essential College function. The College simply couldn't achieve this without your efforts.

I'd like to welcome Thy Boskovic to the office team, as the College's dedicated Marketing, Membership and Events Coordinator. Thy has already hit the ground running with her impressive contributions to marketing Science Week this year. As Science Week will be moving to a much bigger space at The Star at Broadbeach in 2019, and the College is now introducing two new subjects, Thy will play a key role in promoting these. Thy will be attending Science Week this year, so please make yourself known and welcome her to the College. She can be contacted directly at marketing@anzcvs.org.au

And as always, good luck to those undertaking examinations this year!

New Membership Subjects Available

Membership in Veterinary Practice: Equine Membership in Veterinary Practice: Small Animal

The key objective of Memberships in Veterinary Practice, Equine and Small Animal, is to demonstrate that the candidate has the ability to integrate technical and academic knowledge into an advanced level of clinical diagnostic ability and practical acumen.

Candidates will have sufficient knowledge of, and experience in, the aetiology and pathophysiology of common diseases and the ability to appropriately advise or undertake procedures on behalf of veterinary colleagues, not similarly qualified, in the subject of Veterinary Practice.

The new Membership subjects were developed in response to feedback from veterinarians identifying the need for a pathway of development and recognition for those in general practice.

The Membership examination has two separate components:

1. Written Examination (Component 1)
Written Paper 1 (Two hours): Principles of Veterinary Practice
Written Paper 2 (Two hours): Applied Veterinary Practice
2. Oral Examination (Component 2)
Oral (1 hour)

View the complete Membership guidelines at www.anzcvs.org.au

Learning outcomes in both subjects include:

- Anatomy, Physiology and Pathophysiology
- Preventative Health, Wellness and Nutrition
- Therapeutics
- Biosecurity and Infectious Diseases
- Diagnostic Imaging
- Cardiovascular System
- Respiratory System
- Adominal Disorders
- Genitourinary System
- Neurology
- Endocrinology
- Musculoskeletal System
- Surgery
- Analgesia and Anaesthesia
- Emergency and Critical Care
- Ophthalmology
- Dermatology

Each subject has other specific learning objectives. Please see Subject Guidelines for further details.

For more information:

E: examinations@anzcvs.org.au | T: +61 (0)7 3423 2016 | W: www.anzcvs.org.au

PROJECT OFFICER UPDATE

New Membership subjects have been approved by the Board of Examiners and Council! Guidelines for Membership in Veterinary Practice – Equine and Small Animal, are now available on the College website with applications open for inaugural examinations in 2019. In addition to the Guidelines, sample written examination papers will be made available shortly to provide prospective candidates with a representation of the depth and breadth of the examinations.

The Examination Development Fund (EDF) levy is an initiative designed for Chapters to share the investment in examiner education with the College. The intent was that both the College and Chapters would be the beneficiaries of having better trained examiners in their subjects. The funds collected are used to contribute to a small percentage of the costs associated with examination related projects; such as the Examination Results Recording System (ERRS), Examiners Workshops and Chapter Writing Retreats. The levy is collected on a per candidate basis from each Chapter.

One of the major events held annually is the Examiners Workshop. This two-day workshop is an opportunity for examiners to be educated in examination construction, educational theory and the examination policies of the College. It provides an invaluable dedicated period of time that examination teams can meet face-to-face to focus on their examination development. The workshop is structured to include presentations on various aspects of examination construction from an educational expert interspersed with small group activities and blocks of time for individual subject examination construction. Feedback from 28 attendees at the 2018 Examiners Workshop confirms the value in holding this type of event, with the majority of respondents indicating that it provided clarity in the educational theory of examination writing and allocated dedicated time within and between examination teams for collaboration.

Continued over...

2018 Examiners Workshop Feedback

PROJECT OFFICER UPDATE

If you have the time to dedicate and contribute to examining candidates in Membership and Fellowship, please contact the College. We are encouraging experienced Members that have not participated previously in examinations to become involved.

Science Week is almost upon us and the College will trial a new initiative to digitally capture a selection of presentations including the plenary sessions and forum. Members will have access to these recordings for the remainder of 2018. As well as being a valuable educational resource, these presentations should showcase Science Week and promote engagement with the wider veterinary community.

As a reminder to those examiners and candidates planning to undertake examinations in 2018, resources are available on the college website to assist with oral examinations. They can be found at the links below:

<https://www.anzcvs.org.au/oral-examination-information-to-assist-candidates/>

<https://www.anzcvs.org.au/examiners/>

Any feedback or inquiries on the projects mentioned above or on other matters are welcomed.

Thanks,
Rachel

Dr Rachel Tan,
Project Officer, po@anzcvs.org.au

THE AUSTRALIAN AND
NEW ZEALAND COLLEGE OF
VETERINARY SCIENTISTS

SCIENCE WEEK CONFERENCE

5-7 JULY 2018

QT HOTEL, SURFERS PARADISE
GOLD COAST

ABOUT THE CONFERENCE

This is your opportunity to attend a unique multi-stream programme, held on the beautiful Gold Coast. Hear the latest scientific and clinical updates from our world-class presenters, with time to interact socially and professionally with leading industry colleagues from Australia, New Zealand and beyond. Disciplines covered include:

Anaesthesia and Analgesia	Epidemiology	Radiology
Animal Welfare	Equine	Small Animal Medicine
Aquatic Animal	Feline	Small Animal Surgery
Avian	Lab Animals	Unusual Pets
Cattle	Oncology	Behaviour
Dentistry	Ophthalmology	Public Health
Dermatology	Pathobiology	Zoo and Wildlife
Emergency Medicine	Pharmacology	

Note: Registration is open to ALL VETERINARIANS, not just College members. Numbers are limited though, so contact us now to secure your place or find out more.

Full programme and registration details are available on the College website.

T. +61 (0)7 3423 2016
F. +61 (0) 7 3423 2977
E. assistcm@anzcvs.org.au

www.anzcvs.org.au

SPECIAL FEATURE

Dr Fiona Moir is guest presenter at this year's plenary session.

Dr Moir is a Senior Lecturer in The Department of General Practice and in the Medical Programme Directorate at The University of Auckland, specialising in practitioner wellbeing, workplace wellness, mental health and communication skills.

Dr Moir also co-authored the CALM website, an open resource for stress management and happiness, with last year's hugely popular plenary session speaker Dr Tony Fernando.

CHAPTERS

Feline Chapter

The Feline Chapter has been working on getting a great feline presence at College Science week this year; after the success of the pre-science week masterclass day 2 years ago, we have another lined up for this year, with ISFM veterinary director, Dr Andy Sparkes again coming over from the UK for the event. Keynote speakers are internationally renowned neurologist, Patrick Kenny, and infectious diseases guru, Jane Sykes, joined by local popular speakers Sue Foster and Joanna White. The Feline Chapter also has a full day of feline medicine during the main part of Science Week, utilising the same speakers again, with the addition of local feline specialists Kath Briscoe and Keshe Chow, so all in all a huge range of feline medicine topics will be covered. And if that wasn't enough, we have also joined with the Small Animal Medicine Chapter for the young speakers program where we hope to get some great feline abstracts, and a half a day with the Behaviour Chapter for some exciting feline behaviour topics. So if you like cats, you can't afford to miss out on Science Week this year!

We also have some exciting initiatives being planned in collaboration with ISFM which we will hopefully be able to reveal more about at Science Week.

The Chapter have another busy year with examinations this year, with fantastic numbers of candidates sitting both fellowships and memberships both in Australia and in the UK - huge thanks to the examining teams who are currently busy preparing the examinations.

The Feline Chapter Board are also on the lookout for some new Board Members this year; we are seeking nominations for the positions of Secretary, Treasurer, and possibly an additional Board Member to assist with website development. Please feel free to contact any of us ahead of the AGM with expressions of interest, and if you have any queries about what the roles involve. As the number of membership examination candidates continues to increase, we are also intending to put together a contact list of members who are interested in examining in the future, so please get in touch if you are interested!

Hope to see many of you at Science Week and the Pre-Science Week Master Class day

Warm wishes

Kath Briscoe (President)

Andrea Harvey (Secretary)

Mary Thompson (Vice President)

Audra Turner (Treasurer)

Ophthalmology Chapter

Science Week 2018 is shaping up to be an informative and diverse 3 day program. With the focus of our meeting being 'diagnostics in ophthalmology' the Ophthalmology program includes many wonderful local and overseas speakers.

Thursday will showcase the talents of Dr Katharina Flatz (Diplomate of the European College of Diagnostic Imaging) who will discuss the diagnostic utility of advanced imaging in ophthalmology cases as well as give our new residents a platform to present their research in the afternoons 'Resident forum'. Friday offers to expand our knowledge on all aspects of neuro-ophthalmology as Dr Patrick Kenny (Diplomate of both the American College of Veterinary Internal Medicine (Neurology) and the European College of Veterinary Neurology) discusses neuro-ophthalmic pathways, examination and neurodiagnostic tests,

supported by many unusual and interesting case presentations by Chapter members. Friday afternoon we will host a round table discussion on the management and complications of gonio-implant surgery as this modality begins to offer another treatment choice for glaucoma patients. And finally on Saturday morning we have planned a Ophthalmology Grand Panel where attendees can discuss any of their perplexing ophthalmic cases with Ophthalmologists.

Should you have any further questions regarding the Ophthalmology Chapter Science Week program please don't hesitate to contact our secretaries, Dr Kate Hindley/ Dr Jessica Nevile on secretaryophthalmology@anzcvcs.org.au

Animal Welfare Chapter

The Animal Welfare Chapter now has over 60 members with nine candidates sitting for their Memberships this year and a diverse membership of veterinarians from all fields of veterinary science with an interest in the ethical use of animals, animal welfare, veterinary professional ethics and the law.

Each year at Science Week the Chapter organises wide ranging presentations on animal welfare and joins forces with other Chapters on the understanding that animal welfare is a universal theme for veterinarians.

Veterinarians have an obligation to society, a social contract that is said to be at the heart of the professional relationship. In exchange for the statutory restriction of certain acts to the profession, members of the profession must act in the interests of society. There has been a tendency for veterinarians to simply look after animals committed to their care, however, this social contract means that veterinarians have an obligation to society by contributing to the care of all animals and the environment in which they live. It obliges veterinarians to be concerned about all issues having an impact on animal health and welfare with land clearing and climate change being two important such issues.

The other important aspect of veterinary professionalism is the recognition that veterinary expertise is more than medical knowledge and technical competence. It is also the courage and confidence to acknowledge the limitations of knowledge and competency which serves as a spur to increase know-how rather than as an impediment.

The Welfare Chapter program this year, once again, combines these two aspects of veterinary professionalism. Presentations on a wide range of animal welfare issues across a broad spectrum combined with a great opportunity to increase knowledge.

The Welfare Chapter and the Zoo and Wildlife Medicine Chapter have joined forces to debate, discuss and explore ethics and animal welfare in zoos and for wildlife. Presentations include 'Ethics

and welfare in zoos-a global initiative' by Jenny Gray, CEO of Zoos Victoria. Regardless of any personal beliefs about the ethics of zoos, the reality is they are highly popular, numerous and here to stay.

The program will also be looking at international perspectives of animal welfare. David Mellor will be presenting on 'Thriving not merely surviving: New keys for unlocking impediments to enhancing animal welfare' and Peter Thornber will be addressing 'the human and animal welfare impact of the donkey skin trade for Chinese medicine'. The use of Traditional Chinese Medicine is associated with some high impact animal welfare issues.

There will be an afternoon of presentations on working animals and we are joining forces with the Behaviour Chapter on Saturday afternoon with a featured speaker Nadine Gourkow giving a presentation on 'Strategies to reduce viral load by improving emotional health in shelter cats'.

We are pleased to team up with the brand new Lab Animals Chapter for a series of presentations. Sadly, one of their listed speakers John Schofield recently died. John was an outstanding veterinarian who made an enormous contribution to animal welfare through his work with lab animals and he will be sadly missed.

This year the Chapter is pleased to again present the David Bayvel Memorial Award for Excellence in Animal Welfare to a veterinarian who has made an outstanding contribution to animal welfare. David Bayvel, who died in 2016, was one of the world's pre-eminent experts in the fields of animal welfare and veterinary science and it is fitting that an Award has been established in his name.

This program would not have been possible without the sterling work of the main convenor Nita Harding.

Tanya Stephens

President Animal Welfare Chapter

Cattle Chapter

We are looking forward to an exciting program for 2018 with a focus on Beef and Dairy cattle nutrition. We will be having several presentations by keynote speakers as well as some interactive sessions where delegates will be able to have round table discussions and an opportunity to trial some of the software available with experts in the field on hand to guide us through.

This year, our keynote speakers include Jim Gibbs who will be focusing on Grass based systems and the rumen pH; Colin Trengove who will give us an update on trace minerals; Paul Cusack who will be giving us some practical advice that can be

taken into the field; Neil Moss will be showing us key features to focus on in the dairy industry and Rob Bonanno who will be giving us an insight into a dairy on a total mixed ration system

We are also excited that we will have several emerging scientists who will bring us up to date with the research that is being undertaken in our tertiary institutes in both Australia and New Zealand. We look forward to seeing you all at Science Week this year and helping to give general practitioners nutrition tools that can be taken into the field.

Joey Rheinberger (President)

Avian Chapter

The Avian Health Chapter is looking to have a successful Science and Examination Week, with a 2 day program put together by Karen Sayer, and a good roll out of members presenting and attending. We have a good number of candidates enrolled this year, and Deb Monks has run a very successful exam preparation course via Skype and a webinar. Deb has put a massive amount of work into this, and the candidates I have spoken to are excited by their degree of preparation. 2018 looks to be a very successful year for the Chapter, and many thanks to everyone who is contributing.

Bob Doneley (President)

Small Animal Medicine Chapter

The Small Animal Medicine Chapter executive and science week organisers have been hard at work to bring you another great Science Week in early July. For those in more southern states the chance to move north to the more temperate climate of the Gold Coast is appreciated now that winter has finally decided to arrive.

The program this year looks great with the Thursday in a joint session with Feline Medicine with an array of great local and international speakers covering everything from stem cells to infection. The Friday starts with a joint session with the Radiology Chapter and then joining with Feline Medicine for the rest of the day. The Saturday will see us link with Pharmacology for most of the day with a focus on antimicrobial therapies.

We will be having the AGM on Friday afternoon that will be followed by the now classic cocktail party. Drink tickets for this event are distributed at the AGM so you must attend to be part of this great social event. We want people to attend the AGM to have good representation of the topics we need to discuss. We will be seeking volunteers to help continue the running of the chapter committees and other roles. Please attend.

During the meeting we will need session moderators, abstract moderators and abstract judges. It would be great if we can get volunteers from a spread of states and New Zealand.

We look forward to seeing you all on the Gold Coast.

OBITUARY – SYDNEY JOHN MILLER 1926 - 2017

Members and Fellows of the College will be saddened to learn of the death of Sydney Miller.

Sydney was the President of the Australian College of Veterinary Scientists from 1975-1976. He was President of the Queensland division of the AVA (1970) and served on numerous committees and subcommittees of the AVA between 1967 and 1973. He served as a member of the Queensland Veterinary Surgeons Board (1974-1984)

Sydney's qualifications included BVSc (1949), MVSc (1957), and FACVSc (1974).

We extend our sincere sympathy to his family and can assure them that he will be remembered for his significant contribution and commitment to all areas of the veterinary profession.

Science Week Programme

With over 89 educational sessions across 23 Chapters, 14 break out rooms and over 3 days - the College's annual scientific conference offers a truly unique programme that is not to be missed. Check out some of the Chapter highlights below. Don't forget to register and view the full programme on our website.

CHAPTER HIGHLIGHTS

Equine Chapter

Associate Professor Fatima Nasrallah
4:30pm Thursday 5 July

Associate Professor Helen Liley
3:30pm Saturday 7 July

Surgery Chapter

Dr Ronaldo da Costa
Thursday 5 July

Combined sessions with Anaesthesia Chapter
Thursday 5 and Friday 6 July

Surgical Oncology
Saturday 7 July

Aquatic Animal Health Chapter

Prof Roy Yanong
9:00am and 1:30pm Thursday 5 July
9:00am Friday 6 July

Veterinary Public Health Chapter

Thursday 5 July, Orchid Room

- Dr Mark Schipp
- Dr Guyan Weerasinghe
- A/Prof Ricardo Magalhaes
- Adj Prof Steve Hathaway
- Dr Alison Small

Friday 6 July, Malibu Room

- A/Prof Elizabeth Parker

Saturday 7 July, Baywatch Room

- Laureate Prof Colin Masters AO
- Distinguished Prof Nigel French FRSNZ

Veterinary Behaviour Chapter

Dr Gary Landsberg
Thursday 5, Friday 6 and Saturday 7 July

Veterinary Pharmacology Chapter

Prof Pierre-Louis Toutain
Thursday 5, Friday 6 and Saturday 7 July

Veterinary Anaesthesia & Analgesia Chapter

Thursday 5 July

Combined morning session with Behaviour Chapter

Friday 6 July

Combined morning sessions with Surgery Chapter and afternoon shared with Pharmacology Chapter.

Saturday 7 July

Human anaesthetic specialists Dr Adam Keys and Dr Joshua Daly, finishing the day with a panel discussion regarding veterinary anaesthetic monitoring standards.
